station in the Jersey City depot is in operation. The reports of the Erie's alleged unsound financial condition are keeping Vice-President Thomas busy making denials.

There is a unanimity of opinion among passenger men in this city that the Trunk lines should follow in the footsteps of the Central Traffic Asso-tion and fix a one-way rate for round trip to the Fair.

The Ontario and Western has followed some of its competitors in putting on a fast vestibule train to the Cats-kills for Summer traffic.

Vice-President Voorhees, of the Reading, may now have an opportunity to utilize the experience he received on the New York Central in his present trouble with employees of his road.

The roads west of Chicago have wisely decided not to run World's Fair excur-sion trains until Aug. 1. The present light travel and siender prospects for heavier traffic are responsible for this.

Ominous.

(From Truth.) Ethel-Papa wouldn't let me marry him. Maud-Why not? Ethel—Because I called him such a disagree-able pet name. Mau :- What was it? Ethel-Bill.

Why buy an They say that Manager Hammer-stein is putting tar on the roof of the Manhattan Opera-House. Unchari-table commentators decare that Ham-merstein is determined that the first audience he captures shall stick there. imitation or substitute, Judic, the Parisian favorite, has turned to the music halls, where she receives a salary of 800 francs per night. This is, of course, very com-forting, but it is a great fall for the once famous comic opera artist, all the same. when the genuine Willard is in Chicago doing a magnificent business. As reported before, he was a fad in the Windy City during his last engagement there, and this condition of things has been resumed. "The Professor's Love Story is still his most popular play, but he threatens to turn to Hamlet. He has his own "conception" of that play, of course.

The pleasure of the attendence of a few select folks was solicited at the Casino last night by Rudolph Aronson and (do not forget the conjunction) Messrs. Abbey, Schoeffel and Grau, to see Sandow, the strong man, who is to appear before the public to-night. He proved to be truly remarkable, and will undoubtedly attract a great deal of attention. An enormous dumbbell containing a man at each end was easily handled by the young glant. He turned a somersault with a 5-pound dumbbell in each hand. He held one of the attendants in the air by one hand with as much case as though he were a doil. Finally a platform was placed across his chest, and across this three horses, the combined weight of which was estimated at 2,600 pounds, were driven.
